WHAT IS CLAIMED IS:

1.   A service payment system for making payment for services provided in a hotel in which a casino is installed, comprising:

house card issuing means for issuing a house card which stores user information enabling identification of a user of said services;

a house card server for instructing said house card issuing means to issue said house card; and

a service management server for utilizing said user information to manage a casino deposit which enables said user to utilize casino services upon acquirement of said house card, and for outputting service data indicating use of said casino services by said user when usage restriction conditions placed on said casino services are satisfied,

wherein said house card server stores the service data outputted from said service management server, thus enabling payment for said casino services to be performed individually for each said user.

2.   The service payment system according to claim 1, wherein said service management server determines said usage restriction conditions according to the presence or absence of a deposit balance indicating the amount of money remaining in said casino deposit.

3.   A service payment system for making payment for

services provided in a hotel in which a casino is installed, comprising:

house card issuing means for issuing a house card which stores user information enabling identification of a user of said services and deposit data indicating a deposit which enables said user to utilize said services;

means which, when said user utilizes casino services, update said deposit data stored on said house card and output service data indicating use of said casino services by said user; and

a house card server which stores the service data outputted from said means, thus enabling payment for said casino services to be performed individually for each of said user.

4.   The service payment system according to claim 3, further comprising means for restricting use of casino services by said user when a deposit balance indicating the amount of money remaining in said casino deposit has reached zero.
